

Qualifications Summary

Frontend Engineering Leader | Bridging Innovative Design with Scalable Solutions to Empower Global Teams and Transform User Experiences

Dynamic frontend engineering professional with a passion for architecting high-performance web applications through modern frameworks and advanced design principles. Expertise in crafting intuitive, real-time user interfaces that prioritize seamless functionality and aesthetic excellence. Adept at leading cross-functional collaboration to integrate emerging technologies and scalable solutions within global, agile environments. Proven record of mentoring technical talent, driving process innovation, and elevating engineering standards through robust testing practices and modular system design.

Areas of Expertise

- Modern Frontend Frameworks
- UI/UX Design Optimization
- DevOps & CI/CD Practices
- Technical Leadership & Support
- Real-Time Data Systems Architecture
- Performance-Driven Development
- Type-Safe Application Development
- Component-Driven Architecture
- Cross-Functional Technical Collaboration
- Test-Driven Development (TDD)
- Responsive & Accessible Design
- Agile Development Methodologies

Career Experience

Frontend Engineer, Skinstric AI – Remote 2024

Developed and tested a modular component library for skincare product displays using TailwindCSS, facilitating rapid prototype testing and layout adjustments.

- Engineered a high-accuracy skin analysis platform integrating OpenAI Vision API and Next.js 14, achieving a 98% detection rate for various skin conditions.
- Enhanced user interface responsiveness and engagement by developing dynamic skincare recommendation features using TailwindCSS and GSAP animations, boosting user engagement by 60%.
- Achieved a breakthrough in skin condition analysis speed, optimizing the system to deliver results in under two seconds using Next.js Server Components and Lottie animations.
- Created a custom GSAP timeline animation system to streamline user interactions during skin analysis, resulting in a 40% increase in user retention rates.

Frontend Engineer | Frontend Developer & Support Staff, Frontend Simplified – Remote 2024 – 2025

Developed and deployed responsive, user-friendly web and mobile interfaces using HTML, CSS, and JavaScript frameworks like React and Vue.js, significantly improving user experience.

- Enhanced system reliability by integrating REST APIs using React and Firebase for a dynamic NFT website, reducing API response times by 20%, and maintaining 99.99% UI uptime through robust CI/CD pipelines.
- Implemented Git Flow branching strategy and fully automated deployment processes to streamline development workflows and enhance operational efficiency.
- Facilitated workshops on frontend optimization, significantly improving project load times by 50% and mentoring students on React and Next.js projects, ranking in the top 5% of the cohort for peer mentorship.
- Initiated weekly pair programming sessions to focus on accessibility and SEO, leading to 90% of mentored projects achieving WCAG compliance, and created resources that enabled 70% of students to develop type-safe applications using React and TypeScript.
- Collaborated with senior developers to ensure code quality, achieving 80% code coverage with Jest and React Testing Library, and designed visually compelling UIs for over 500 users, optimizing data management with React Query.

Education

Frontend Developer Certificate (2025) | Frontend Simplified
Bachelor of Science in Electrical Engineering & Communications | ITT Technical Institute, San Bernardino, CA
Associate of Science in Computer & Electronics Engineering | ITT Technical Institute, Orange, CA

Key Project

Search API Project – Created a fully functional search platform for movies

- Developed a versatile search API for movies and anime, featuring responsive design, dynamic routing, and advanced loading states to enhance user search experience and content navigation.

Technical Skills

Programming Languages: TypeScript, JavaScript, HTML, CSS
Frameworks: React, TailwindCSS, Firebase, Supabase, NextJS, Redux, React Query, React Hook Form, Zustand
Tools & Other Platforms: Netlify, Vercel, GitHub, Vite, Figma, VS Code, Jest, React Testing Libraries
